

Organizing Bank On Coalition Leadership for Success: A Logic Model

As Bank On coalition leaders organize their efforts for local success, they encounter multiple threads of opportunity. The logic model in this chapter offers a framework for defining logical relationships among resources, activities, outputs, and outcomes. As such, it is as much a tool for planning and implementation as it is for fundraising and evaluation.

The coalition logic model is organized in four primary streams: improving the financial service marketplace through basic transaction accounts, connecting people to those accounts, creating and maintaining vibrant coalitions, and advocating for banking access and financial empowerment issues.

This logic model was designed based upon the experiences of, and in consultation with, Bank On coalition leaders across the country. It was further refined by the CFE Fund as part of its Bank On Fellows initiative. It is a living document, intended as a guide for local application and users' own experiences. Please share your own logic model thoughts by contacting [Paige Diner](#) on the CFE Fund's Bank On team and join our [Bank On Listserv](#) to discuss with peers.

Outcomes

Certified accounts are available at multiple financial institutions in the community

Account availability is supported by coalition relationships that promote information and feedback between financial institutions and community partners

People in the community are widely aware of certified accounts and how to use them

People have access to enrolling in certified accounts through integrated programmatic access points

A strong Bank On coalition sustains Bank On outcomes

Features of a strong coalition include: members from each key banking access sector, accountability among members for contributing to coalition success, adequate infrastructure and staffing, adequate and sustained financial support

Community influencers understand and communicate about key banking access issues

Key banking access issues include: why banking matters, barriers to banking, appropriate accounts, predatory products and practices, and regulatory landscapes
